

ENVIRONNEMENT

Composting and recycling green and organic wastes

We help you in recycling and valorisation of vegetal and organic wastes:

-  **Green wastes**
-  **Sludge from water treatment plants**
-  **Liquid manures, droppings**
-  **Residues from food industries**
-  **Fermented parts of household garbage**

Ventilation and regulation required for the conversion of material into compost.

Controlling temperatures and oxygen

Our equipments that are designed according to an energy-efficiency model have a centralized management with control of all parameters and alarms.
